

Statement of Funding

About Us

The AI Safety Awareness Project (AISAP) is a 501(c)(3) educational nonprofit. Our mission is to equip individuals and traditional pillars of American society with comprehensive knowledge of the current and future implications of artificial intelligence (“AI”). We fulfill this mission via educational workshops serving community centers, libraries, universities, churches, police departments, and civic institutions nationwide.

Our Inception

From our inception in the summer of 2024 to the spring of 2025, we were an all-volunteer program with costs and fees funded on a personal basis by our team. Since our incorporation as a nonprofit with 501(c)(3) tax status in spring 2025, we have received generous donations from:

- AI Safety Tactical Opportunities Fund (AISTOF)
- Jana and Howard Wolff
- An anonymous donor

Our funds come without any donor restrictions. We are truly grateful to our donors for supporting our mission, strategy and vision.

We are not, and will not be funded by any AI companies.

Changlin Li, Executive Director
